FAS-START Seed Starter Fertilizer

WHEN TO USE:
Any Time During the Growing Season

Fas-Start is a rich mixture of plant foods specifically blended for rapid establishment of sod or new seedings in turf grass areas. Fas-Start's NPK Fortified Formula contains all essential nutrients needed to produce the best results regardless of soil quality, and supply all the needed elements which often may be missing in new lawn areas. The high levels of phosphorous and potash work to develop strong root systems, while nitrogen greens and thickens the developing plants.

Available in 5,000 Square Foot Bags
