Turf Line Arthroban® Grub and Insect Control

WHEN TO USE:
April to Mid-May and August through October

Insects can create unsightly bare spots or completely destroy your beautiful green lawn. Underground, grubs feed on the roots and from above, a variety of insects can cause additional damage. TURF LINE Arthroban effectively controls Japanese beetles and European chafer grubs. It also kills ants, chinch bugs, sod webworms, and many other insect pests. Use anytime of the year when insects are active. Prime grub treatment time is early August through October, or in the spring for grubs that have wintered over time. May also be used in April to mid-May.

Available in 5,000 and 10,000 Square Foot Bags

Eliminates Grubs & Other Damaging Lawn Insects
